SHOULDER

ELBOW

Effective treatment for many musculo-tendon indications. Reduced treatment sessions compared to alternative forms of ESWT.

CELLSONIC IN EXTRACORPEAL SHOCKWAVE THERAPY (ESWT)

We use electrohydraulic shockwaves to bring you effective and low cost healing.

It is the high speed nature of the wave that causes “micro tears” in structures to elicit a biological response.

- Extracorporeal shock wave therapy **(ESWT) with Focused Electrohydraulic Shockwaves** are the most effective shockwaves in non-invasive treatments for chronic pain in the musculoskeletal system.
- The unique **SOFT START** feature enhances the patient experience without the use of masking anaesthetics.
- With a **10 year warranty**, you are safe in the knowledge that **Cellsonic Medical** will provide you with unparalleled value for your investment and the lowest Cost of Cure.
