

CELLSONIC MAKES ITS INTRODUCTION IN PROFESSIONAL FOOTBALL

Headed up by Club Doctor, Peter Florida-James (second from left), the medical team at Queens Park Rangers Football Club take delivery of their Cellsonic machine. Having looked at the shockwave alternatives available to them, Cellsonic were proud to be selected as the supplier to the football club. "The advantages focused shockwaves hold over radial shockwaves, means more effective therapy and fewer treatments", was one of the key messages in the selection process.

Focused electrohydraulic shockwaves are the quickest, most effective shockwaves you can get. Whether your decision is based around pure commercial numbers - we provide the lowest cost of cure OR if you base your argument around the most effective treatment – we heal with fewer sessions, fewer shockwaves, then Cellsonic is first choice in either criteria.

Coupled to this, you get an unrivalled 10 year warranty, then it is easy to see why this is the first stage in the journey to establish Cellsonic as the brand of choice in ESWT.
